L Remarks

Local Option

Dispatched to approximately 11400 S. 4000 W. on a report of a "pink, gummy, substance" on the side of the road. E-62, L-61, and HM-61 all responded. E-62 was the first to arrive and they secured the scene and waited for the HazMat experts to arrive. They did describe a spill of approx. 5x5 on the side of the road. L-61 and HM-61 arrived and assumed command. E-62 cleared.

The spill was on the west side of the road on 4000 W. just south of 11400 S. There is a large shoulder of dirt that butts up next to a field and it is a common area for semi-trucks to park. As we were on scene a citizen passed by and said that he noticed a white, refrigerated truck there this morning and also noticed that the spill had already occurred. He did not have any additional info on the truck. On our arrival there was no truck present. We approached the substance and it was a maroon colored jelly type substance that had developed a skin over the top. The substance had a raspberry odor as well an odor of alcohol that smelled like the substance had been fermenting. A sample was obtained and returned to the HazMat trailer where we were set up to HazCat the substance.

We used the Liquid HazCat Chart to help guide us in the identification of the substance. The flow chart was followed and included the Evaporation Test, Oxidizer/Acid Test, Water Solubility Test, pH Test, Combustibility Test, Char Test, Sugar Test, and Arsenic Test. The substance tested positive for Sugar.

After evaluating all of the evidence and the circumstances we determined that the substance was a non-hazardous, sugar based, food product. B-61 (Butler) was contacted by cell to advise him of the situation.
