## **South Jordan City Converts City Park to Secondary Water Irrigation**

**SOUTH JORDAN, UT** – Recently the City of South Jordan completed a project that switched the source of water used to irrigate City Park from drinking water to a secondary water irrigation system.

City Park consists of 50 acres of irrigated turf and the conversion will save \$133,000 per year by not using drinking water. Annual savings will increase each year as the cost of drinking water increases. In total, more than 256 acre feet or 86,000,000 gallons of drinking water will be saved annually. The amount of drinking water saved and conserved is enough to supply 465 homes annually, both indoor and outdoor usage.

City Park is located at 11010 South Redwood Road and features fields used for football, soccer, baseball, softball, playgrounds and more.

###

*The City of South Jordan, one of the fastest growing cities in the United States, is located 20 miles southwest of Salt Lake City, and home to more than 64,000 residents. In 2010, 2012, and 2014, South Jordan was named one of the Top 20 “Best Place to Live in America” by Money Magazine.*
