

South Jordan Police Department Collect Quarter Ton of Unused Medications

South Jordan Newsroom

We collected 594.4 pounds of unused or expired medications this past Saturday from our two drop-off sites. This is over 1/4 ton of medications that people cannot use improperly! Thanks South Jordan for making us a medicine wise community!

We also collected 39 old car seats and 8 bicycle helmets for recycling - saving hundreds of pounds of materials that takes centuries to breakdown. They will now be recycled and turned into new plastic, metal and fabric products! We are also an earth friendly community.

Anyone having old medications that they need to dispose of can bring them to the SJPD during business hours. Old car seats and bicycle helmets can be brought to a new permanent drop-off shed inside the Riverton City Park (1500 W 12600 S).

Thanks South Jordan residents! Keep up the good work!
