

# Fire Breathing Dragon Craft Instructions

1. Cut your colored paper to the length of your cardboard tube so it will wrap all the way around
2. Glue the colored paper onto the tube
3. Glue a googly eye on a large pom pom. Repeat for the other eye.
4. Pick an end of the tube to glue the eyes onto
5. Cut or tear your tissue paper into 5" - 8" strips. Glue a small part of the strips to the inside of the 'mouth' end of the tube. You want most of the paper to stick out
6. After the glue has dried, blow through the back or your dragon's head to make it blow fire!
